

HTML GUI Documentation

VERSION HISTORY:

| Date | Version Number | Release Notes |
|------------|----------------|---|
| 2022-05 | 1.0 | Initial Release |
| 2022-06-06 | 1.1 | Added New Layout |
| 2022-09-26 | 1.2 | Added Yealink overlay, Notes on whitelist |
| 2022-12-08 | 1.3 | Updated volume component. Changed icons, added new config options |
| 2023-02-07 | 1.4 | Updated color preference load process, updated CSS to use variable definitions for custom color overlays. |

DESCRIPTION:

This document details the steps required to setup and use of an HTML 5 interface with Netlinx connectivity. This document only covers the HTML 5 setup and configuration. See the implementation guide found with the relevant duet module for setup considerations and information.

REQUIRED FILES:

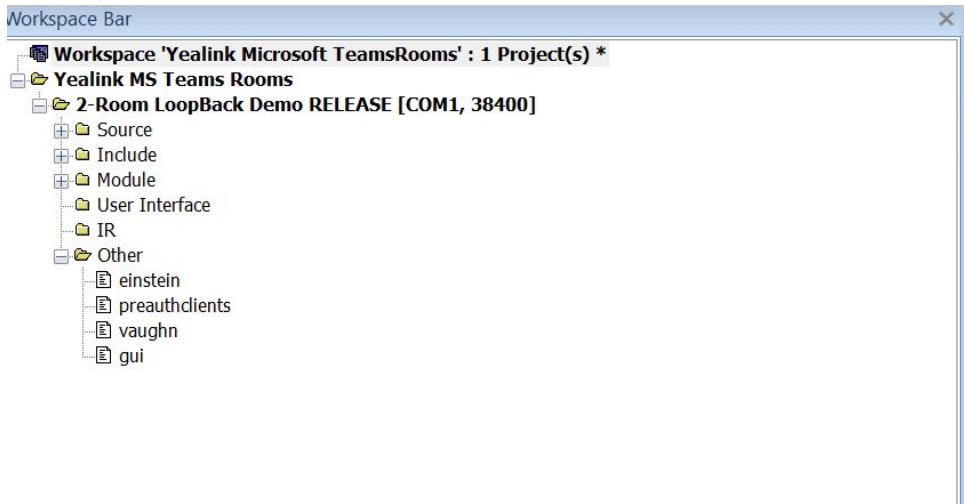

gui.zip - The zip file containing the relevant web files for deployment
configuration file - a .json file containing the configurations desired for the user interface.

PROCESS:

LOAD FILES TO PROCESSOR:

In Netlinx Workspace:

Right Click on the "Other" Folder
Select Add Existing Other File
Add the gui.zip file
Add the configuration file
Load the Files (and program) to the controller and reboot the controller.

Pre-Authorized Client Database

When required a Pre-Authorized Client database will be enabled at this module. This is exclusively predicated on the limitation at the connecting client hardware of maintaining the Persistent Authorization JWT Cookie for the specified 400-days.

When deployed on a DNS network the FQDNS HostName must be referenced as the client in any Command or the csv file.

CREATING USER ACCOUNT:

Each new processor will need to have a security role created, and user accounts created for each instance that will be connecting.

CREATE A NEW ROLE:

If not already complete, a new role should be created in Security settings for the HTML interface. This step only has to be done once per processor.

- Select Security > Role
- Select "Add Role"
- Role Name = webui
 - "webui" is an example name, and another can be substituted.
 - Note: Username is case sensitive.
- Permissions
 - check "HTTP/HTTPS"
- Select Accept

Add New Role

Role Name: *

WebUIRole

Permissions:

☐ Audit Log

☐ Firmware/Software Update

☐ General Configuration

☐ Network Configuration

☐ Security Control

☐ Touch Panel Administration

☐ User Access 2

☐ User Access 4

☐ Device Configuration

☐ FTP Access

☒ HTTP/HTTPS

☐ Program Port Access

☐ Telnet/SSH/SSH FTP Access

☐ User Access 1

☐ User Access 3

☐ User Management

✕ Cancel

✓ Accept

CREATE A NEW USER:

- Select Security > Users
- Select "Add User"
- Fill out the User Name and Password fields
- Choose Type > Device
- Choose Roles > webui (or role name created in previous step)
- Click Accept.

Add New User

User Name: *

Room Name

✕ Cancel

✓ Accept

ACCESSING THE WEB INTERFACE:

The URL for each user interface will vary depending on the settings used in the netlinx program. The URL variable includes the device number from the netlinx code (this allows differentiation between user interfaces/rooms).

The URL is constructed as follows:

`http://<NX_CONTROLLER_IP>:8080/web/ui/<ui_device_number>/home/`

Assuming the IP address of the controller is 172.20.254.175 and the below Netlinx code:

```
DEFINE_DEVICE

vdvWebServer      = 41999:1:0;
vaughnUI          = 41100:1:0;
dvVaughnUI        = 0:2:0;

vdvWebServer_2    = 41998:1:0;
einsteinUI        = 41101:1:0;
dvEnsteinUI       = 0:3:0;
```

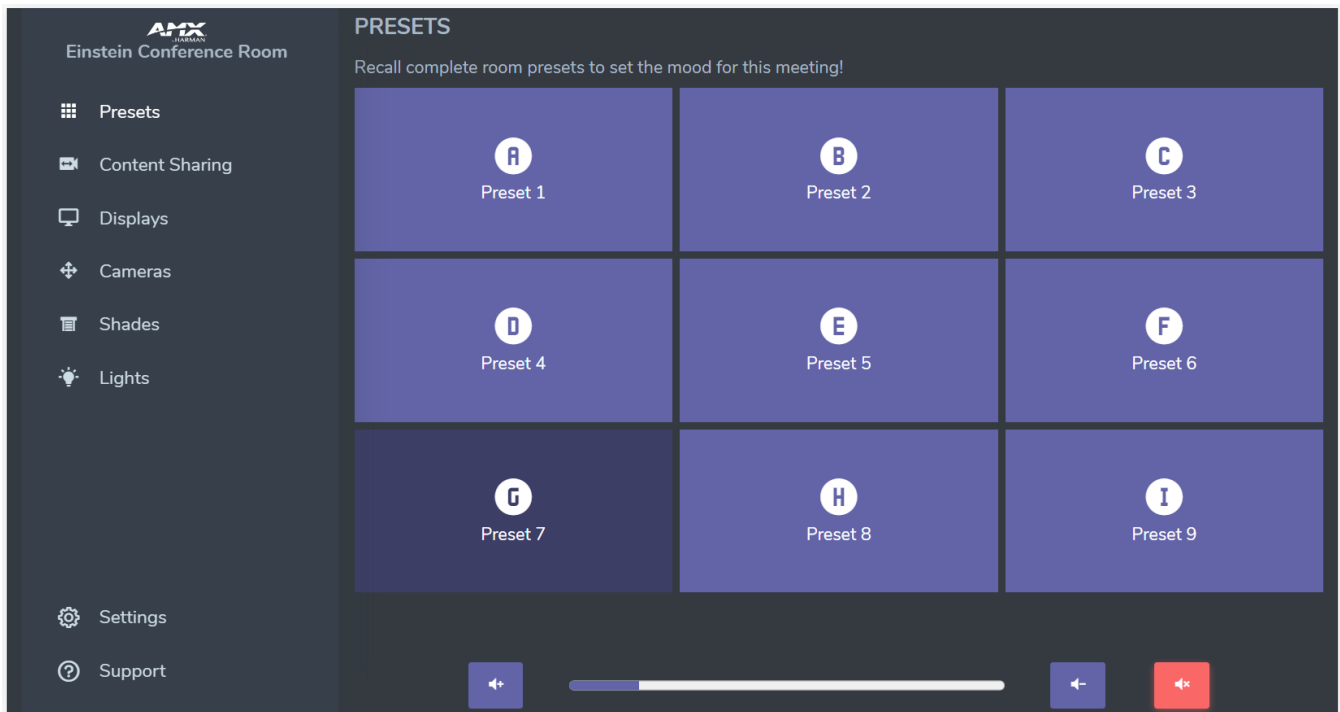

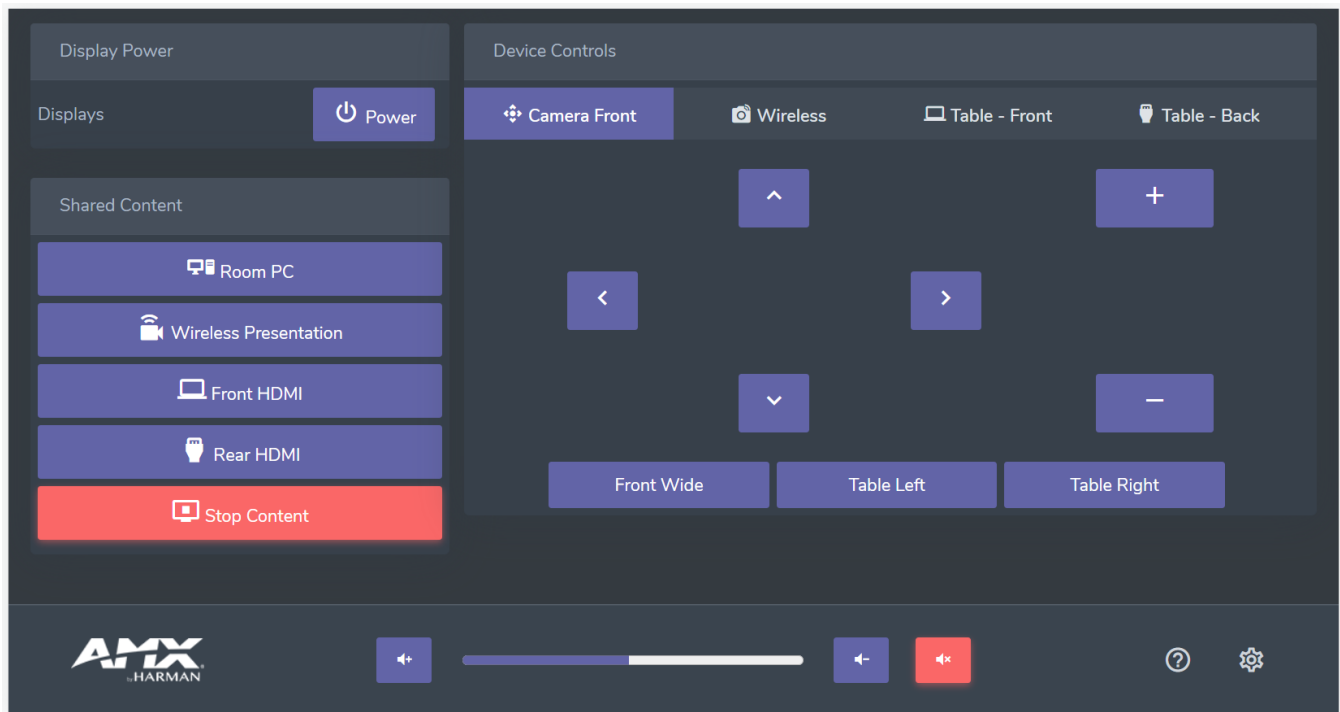

The URL for the two rooms would be:

- <http://172.20.254.185:8080/web/ui/41100/home/>
- <http://172.20.254.185:8080/web/ui/41101/home/>

LOGIN:

Once connected to the controller's web page, the user account needs to login on the first access. Note - Login is persistent and is a one-time task per touch interface.

Provide the appropriate details and the system should connect and redirect to the example layout:

CONFIGURATION JSON FILE

The system configuration is done via modifications to the JSON file, which is then loaded to the NX controller. Different templates will have different JSON structures, with a shared set of core options to select. Refer to documentation for each layout to determine appropriate JSON options.

CORE FIELDS:

| Name | Default | Options | Description |
|-------------|---------|-----------------------------|---|
| template | None | See List of Templates Below | Sets desired template. Should be first. Will alert/error if not included in file. |
| colorScheme | Dark | dark light | |

| | | | |
|-------------|------|-----------------|---|
| overlay | None | SEE TABLE BELOW | |
| title | None | String | Title to show for room and tab in browser |
| support | {} | Email, phone | If not defined, the help button will not show in rendered panel |
| showSupport | None | true false | If true, but support details not included, the option will not be shown |
| showHeader | True | true false | Hides the top navigation bar |
| showFooter | True | true false | Hides the bottom footer bar |

OVERLAY OPTIONS:

| Field Value | Description |
|--------------|---|
| "" | No value will default to a basic black and white color scheme. |
| "teams" | Generates a purple, MS Teams color scheme. |
| "yealink" | Generates a Yealink specific color scheme to match the existing Yealink colors and present a more unified experience. |
| "googlemeet" | Generates a color scheme based off of google meet colors. Default application should be light. |

TEMPLATE LIST:

| Name | JSON Value | Description |
|--------------|------------|--|
| Side By Side | sideBySide | Two large almost equal columns of content. Left includes an option for power, source selection, and an area for device controls. |
| Left Bar | leftBar | Left hand navigation pane, large tab content page on the right. volume control on the bottom of the page (sticky) |
| | | |

Appendix: Left Bar Layout

This template requires the following fields for basic configurations. Device/Sub-Pages are contained within the categories array, which have the same general structure for each category. Configuration of individual category options follows the structure for the components they are built off of. Excessive buttons will force a scroll bar to appear. On most browsers the scroll bar will disappear when not actively scrolling.

This template supports the following options:

- Volume control - displayed in the footer of the content tabs. Always visible
- Presets - Simple grid of buttons
- Vertical Button Group - Single column of buttons
- Display Power - Configurable toggle or discreet controls
- Camera Controls - Note: Presets are moved in this layout to category preset section
- Shade Control - Includes up/down/stop
- Lighting control - both level/dimmable and toggle options.

TEMPLATE MINIMUM CONFIGURATION OPTIONS:

NOTE - for proper display, showFooter and showHeader must be defined as false.

```
"template": "leftBar",
"colorScheme": "dark",
"overlay": "teams",
"title": "Einstein Conference Room",
"showHeader": false,
"showFooter": false,
"categories":[
  {"title":"CATEGORY 1" ...},
  {"title":"CATEGORY 2" ...},
  {"title":"CATEGORY 3" ...},
]
```

CATEGORY STRUCTURE:

| Name | Default | Options | Description |
|----------------------------|---------|---|---|
| title | None | String | Title of Category, displays in navigation structure and optionally on top of tab content |
| showTitle | None | true false | Show or hide title in sub-template. Will still show in the navigation structure |
| icon | None | valid MDI icon | "mdi-my-icon" |
| type | None | btngrid vertbtngroup displays cameras shades lights | Defines the sub-template to be loaded for category |
| instruction | None | String | Instruction block of text to show |
| showInstruction | None | true false | Show or hide the instruction block |
| presets | None | {} | See preset configuration table |
| <type specific definition> | None | | Each type has a different configuration. Refer to the appropriate table for name/options. |

PRESETS STRUCTURE AND MINIMUM CONFIGURATION OPTIONS:

Please note, the Presets category (defined by "type:"btngrid") uses the button grid as a default and has a mildly different configuration setup.

```

"presets": {
  "config": {
    "title": "Presets",
    "showTitle": true,
    "gridJustify": "start",
    "gridSize": 6,
    "btns": [
      {"text": "Wide", "channel": 219, "icon": "mdi-account-group"},
      {"text": "Podium", "channel": 220, "icon": "mdi-podium-gold"},
      {"text": "Privacy", "channel": 221, "icon": "mdi-eye-off"}
    ]
  }
}

```

PRESETS

BUTTON GRID CONFIGURATION:

| Name | Default | Options | Description |
|---------------------|--------------|--|--|
| id | unique value | String | Sets id for HTML and JS use |
| port | 1 | 1-20 | Netlinx Port |
| title | Button Grid | String | |
| showTitle | false | true false | |
| titlePOS | start | start center end | Position of text. start = left. center = center. end = right |
| instruction | None | String | Instruction block displayed directly under the title |
| showInstr uction | false | true false | |
| instructio nPOS | start | start center end | Position of text. start = left. center = center. end = right |
| gridSize | 4 | 1,2,3,4,6,12 | Changes the number of buttons in a single row. Buttons increase/decrease in size depending on number of buttons in a row. |
| gridMargin | 1 | 0-5 | Changes space between each button in a row. May force buttons to a second row if the combo of grid size and margin exceeds row max width |
| gridJustify | center | start center end | Position of the grid (useful for grids with less buttons) |
| color | primary | primary secondary success error warning info light dark link | Bootstrap 5.0 color variants |
| btns | array | | Array of objects to define each button |

BTNS[{}]

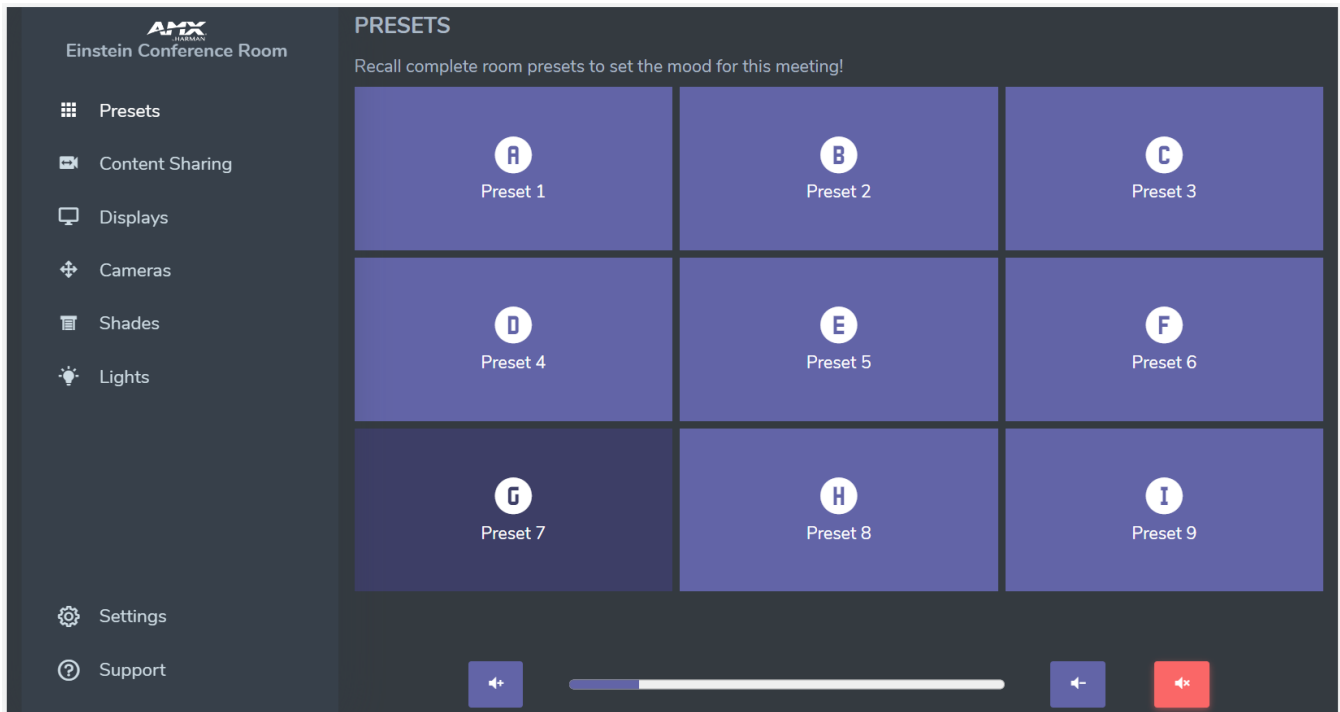

| Name | Default | Options | Description |
|---------|---------|--|------------------------------|
| text | none | String | Button label text |
| icon | none | valid mdi icon | |
| color | none | primary secondary success error warning info light dark link | Bootstrap 5.0 color variants |
| channel | none | 1-1024 | Netlinx channel |

CATEGORY - btngrid

This sub-template uses the configuration options of the btngrid component for display. It's structure varies from the other pages as their is no "presets" section, and the title and instruction block is contained in the config object which parent is the category object and not the preset object. Refer to the example below for minimum structure definition.

| Name | Default | Options | Description |
|--------|---------|----------------|-----------------------------------|
| title | None | String | Display title |
| icon | None | valid MDI icon | Icon displayed in side navigation |
| type | | btngrid | Sets btngrid sub-template |
| config | | | Button grid configuration options |
| btns | array | | Defines displayed buttons |

```
"categories": [
  {
    "title": "Presets",
    "icon": "mdi-apps",
    "type": "btngrid",
    "config": {
      "title": "Presets",
      "showTitle": true,
      "instruction": "Recall complete room presets to set the mood for this meeting!",
      "showInstruction": true,
      "gridSize": 3,
      "btns": [
        {"text": "Preset 1", "channel": 201, "icon": "mdi-alpha-a-circle"},
        {"text": "Preset 2", "channel": 202, "icon": "mdi-alpha-b-circle"},
        {"text": "Preset 3", "channel": 203, "icon": "mdi-alpha-c-circle"},
        {"text": "Preset 4", "channel": 204, "icon": "mdi-alpha-d-circle"},
        {"text": "Preset 5", "channel": 205, "icon": "mdi-alpha-e-circle"},
        {"text": "Preset 6", "channel": 206, "icon": "mdi-alpha-f-circle"},
        {"text": "Preset 7", "channel": 207, "icon": "mdi-alpha-g-circle"},
        {"text": "Preset 8", "channel": 208, "icon": "mdi-alpha-h-circle"},
        {"text": "Preset 9", "channel": 209, "icon": "mdi-alpha-i-circle"}
      ]
    }
  }
]
```

CATEGORY - vertbtngroup

Category uses default category object. with "sources" as the container for the configuration option of the vertical button group.

| Name | Default | Options | Description |
|-----------|---------|----------------------------|-----------------------------------|
| title | None | String | Display title |
| showTitle | false | true false | Shows title on sub-template |
| icon | None | valid MDI icon | Icon displayed in side navigation |
| type | | vertbtngroup | Sets vertbtngroup sub-template |
| presets | None | config: {} | Uses btn grid configuration |
| sources | object | Button Group Configuration | Defines displayed buttons |

SOURCES {} - BUTTON GROUP CONFIGURATION:

| Name | Default | Options | Description |
|-------------------|--------------------------|--|---|
| id | Auto-Generated unique ID | | Provides HTML ID for associated buttons. |
| port | 1 | Integer from 1 - XXX | Netlinx port |
| mutuallyExclusive | false | true false | Defines if multiple buttons in group are allowed to show active state at the same time. |
| color | primary | primary secondary success error warning info light dark link | Sets color choices based on bootstrap 5.0 color variants |
| display | none | rounded, outline | Can be stacked - "rounded outline", or individual "rounded" |
| spacing | 3 | 0 - 5 | Margin applied to the bottom of the button |
| showIcon | false | true false | Show icon defined for button on the button. |
| btns | none | See Below Table | Will generate error/alert if no btns defined. |

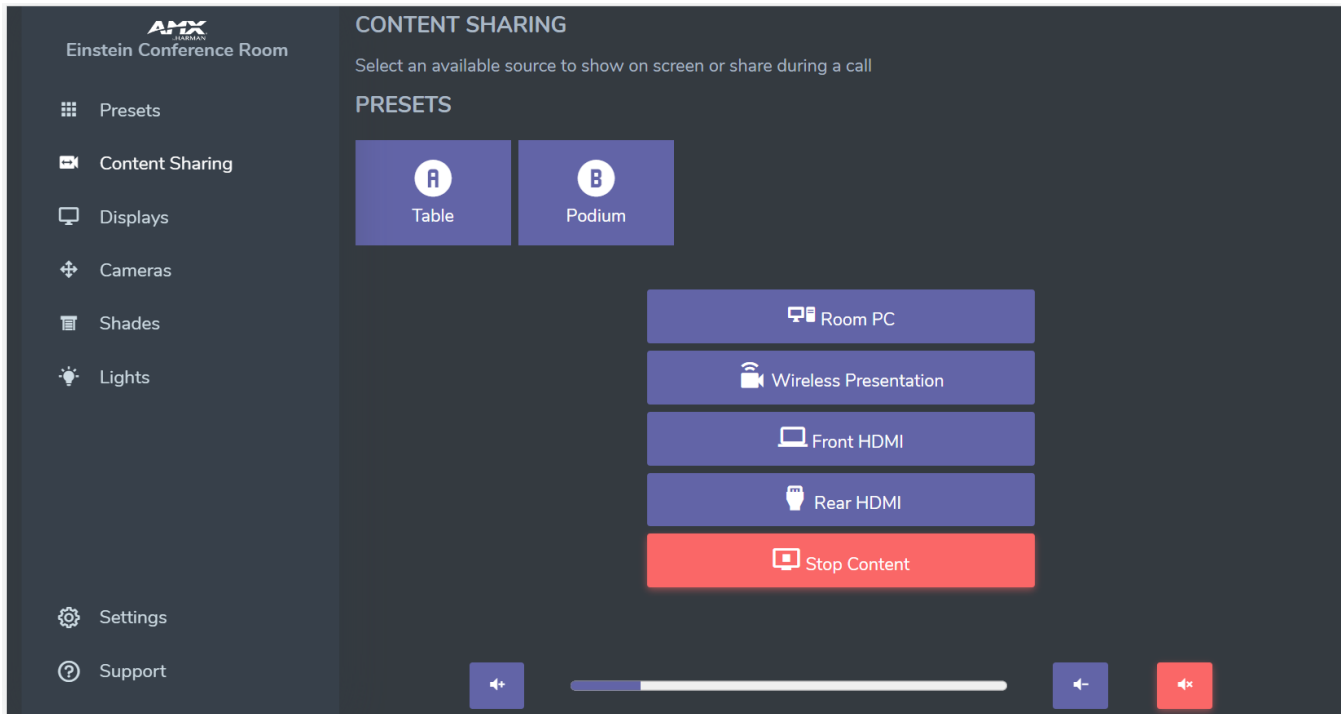

btns[{}]:

btns is an array, with object to determine the settings for the buttons

| Name | Default | Options | Description |
|---------|------------------------------|--|--|
| label | none | string | Text shown on button |
| icon | audio-video | any valid mdi icon | Icon list from theme pack. Name of icon without the preceding mdi. IE - "mdi-audio-video", becomes "audio-video" |
| channel | none, but field is mandatory | integer | Netlinx Channel for output and feedback |
| margin | none | 0 - 5 | Replaces the spacing defined in the configuration options object with spacing to "this" button only. Only applies to margin bottom |
| color | none | primary secondary success error warning info light dark link | Replaces the default color scheme with the color defined for "this" button. |

vertbtngroup configuration

```
{
  "title": "Content Sharing",
  "showTitle": true,
  "type": "vertbtngroup",
  "icon": "mdi-video-switch",
  "instruction": "Select an available source to show on screen or share during a call",
  "showInstruction": true,
  "presets": {
    "config": {
      "title": "Presets",
      "showTitle": true,
      "instruction": "",
      "showInstruction": false,
      "gridJustify": "start",
      "gridSize": 6,
      "btns": [
        {
          "text": "Table",
          "channel": 210,
          "icon": "mdi-alpha-a-circle"
        },
        {
          "text": "Podium",
          "channel": 211,
          "icon": "mdi-alpha-b-circle"
        }
      ]
    }
  },
  "sources": {
    "mutuallyExclusive": true,
    "showIcon": true,
    "spacing": 1,
    "btns": [
      {"label": "Room PC", "icon": "mdi-desktop-tower-monitor", "channel": 212},
      {"label": "Wireless Presentation", "icon": "mdi-video-wireless", "channel": 213},
      {"label": "Front HDMI", "icon": "mdi-laptop", "channel": 214},
      {"label": "Rear HDMI", "icon": "mdi-video-input-hdmi", "channel": 215},
      {"label": "Stop Content", "icon": "mdi-television-stop", "channel": 216, "color": "danger"}
    ]
  }
}
```

CATEGORY - displays

Category uses default category object with "displays" as the container for the configuration option of the display power group.

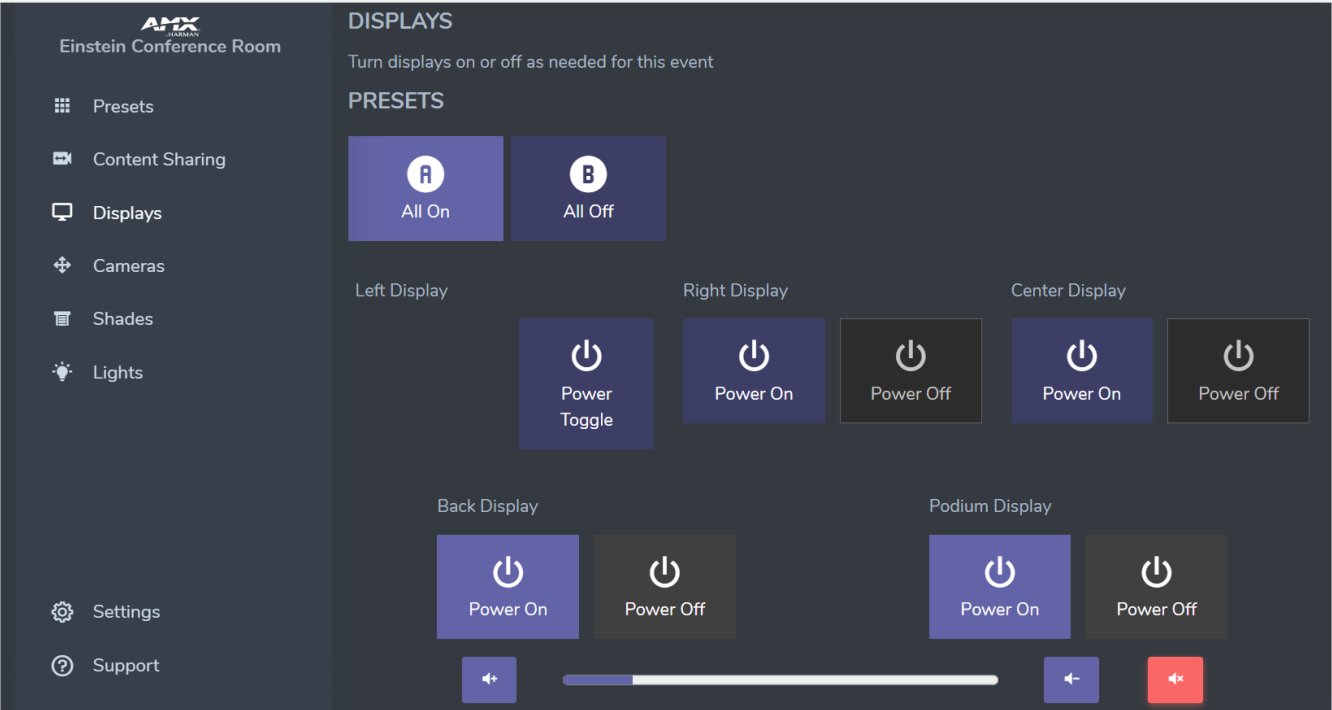

| Name | Default | Options | Description |
|-----------|---------|----------------------------|-----------------------------------|
| title | None | String | Display title |
| showTitle | false | true false | Shows title on sub-template |
| icon | None | valid MDI icon | Icon displayed in side navigation |
| type | | displays | Sets vertbtngroup sub-template |
| presets | None | config: {} | Uses btn grid configuration |
| displays | array | Button Group Configuration | Defines displayed buttons |

DISPLAYS [{}]- BUTTON GROUP CONFIGURATION

| Name | Default | Options | Description |
|-----------|---------------------------|-----------------------------|---|
| title | none | | Title displayed next to widget |
| mode | "discreet" | "sb-discreet" "sb-toggle" | Discreet renders individual buttons for both ON and OFF. Toggle will render a single button to toggle the power |
| label | ["Power On", "Power Off"] | | Formatted as an array, any text value is accepted. |
| icon | mdi-power | Any valid mdi icon | Check supported list of icons to verify. String should be structured as "mdi-my-icon" |
| port | 1 | Netlinx Device Port | Device Port declared in Netlinx programming |
| fbChannel | 255 | Netlinx SNAPI channel | |

displays power configuration

```
"categories":[
{
  "title": "Displays",
  "showTitle": true,
  "instruction": "Turn displays on or off as needed for this event",

      "port": 5,
      "showTitle": true,
      "mode": "sb-discreet",
      "margin": 0
    }
  ]
}
]
```

CATEGORY - camera

Category uses default category object. with "cameras" as the container for the configuration option of the PTZ Configuration Option. For proper display and operation, remove any presets defined in the camera control and add them to the category preset option.

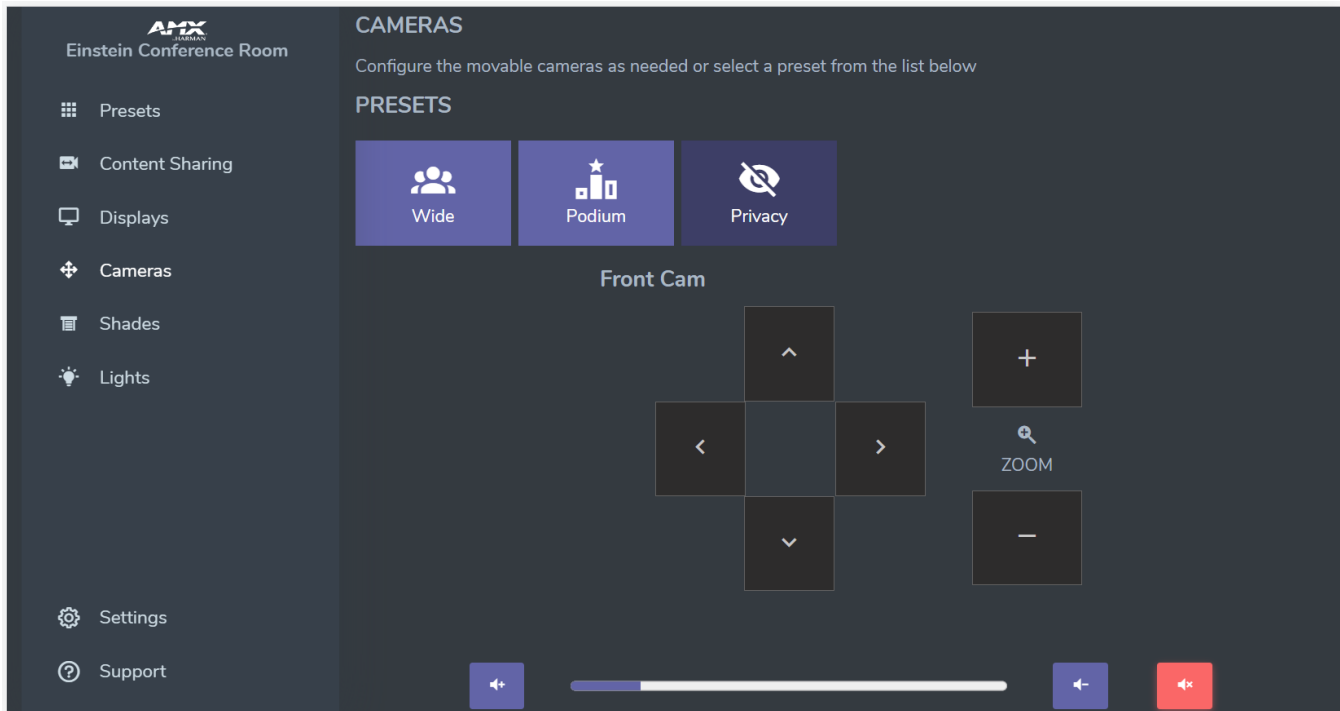

| Name | Default | Options | Description |
|-----------|---------|----------------------------|-----------------------------------|
| title | None | String | Display title |
| showTitle | false | true false | Shows title on sub-template |
| icon | None | valid MDI icon | Icon displayed in side navigation |
| type | | cameras | Sets camera sub-template |
| presets | None | config:{} | Uses btn grid configuration |
| cameras | array | Button Group Configuration | Defines displayed buttons |

CAMERA CONFIGURATION

| Name | Default | Options | Description |
|-----------|---------|-----------------|---|
| id | None | String | Used for HTML purposes |
| port | 1 | 1 – 20 | NX programming port |
| Title | None | String | Title to show for project |
| showTitle | false | True false | Hide or show the title block |
| type | none | none 'style1' | style1 is used for proper display in left bar template. |

Camera Configuration

```
"categories":[
{
  "title": "Cameras",
  "showTitle": true,
  "type": "cameras",
  "icon": "mdi-arrow-all",
  "instruction": "Configure the movable cameras as needed or select a preset from the list below",
  "showInstruction": true,
  "presets": {
    "config": {
      "title": "Presets",
      "showTitle": true,
      "gridJustify": "start",
      "gridSize": 6,
      "btns": [
        {"text": "Wide", "channel": 219, "icon": "mdi-account-group"},
        {"text": "Podium", "channel": 220, "icon": "mdi-podium-gold"},
        {"text": "Privacy", "channel": 221, "icon": "mdi-eye-off"}
      ]
    }
  },
  "cameras": [
    {
      "title": "Front Cam",
      "type": "style1",
      "showTitle": true,
      "port": 1
    }
  ]
}
]
```

CATEGORY - shades

Category uses default category object. with "shades" as the container for the configuration.

| Name | Default | Options | Description |
|-----------|---------|----------------------------|-----------------------------------|
| title | None | String | Display title |
| showTitle | false | true false | Shows title on sub-template |
| icon | None | valid MDI icon | Icon displayed in side navigation |
| type | | shades | Sets shades sub-template |
| presets | None | config: {} | Uses btn grid configuration |
| shades | array | Button Group Configuration | Defines displayed buttons |

SHADES CONFIGURATION

| Name | Default | Options | Description |
|-----------|---------------|----------------------|---------------------------|
| id | unique | string | |
| port | 1 | 1-20 | Netlinx port |
| title | Shade Control | String | Descriptive label |
| showTitle | false | true false | |
| titlePOS | start | start center end | |
| showStop | true | true false | hide/show the stop button |
| showText | false | true false | Show button label text |

Shades Configuration

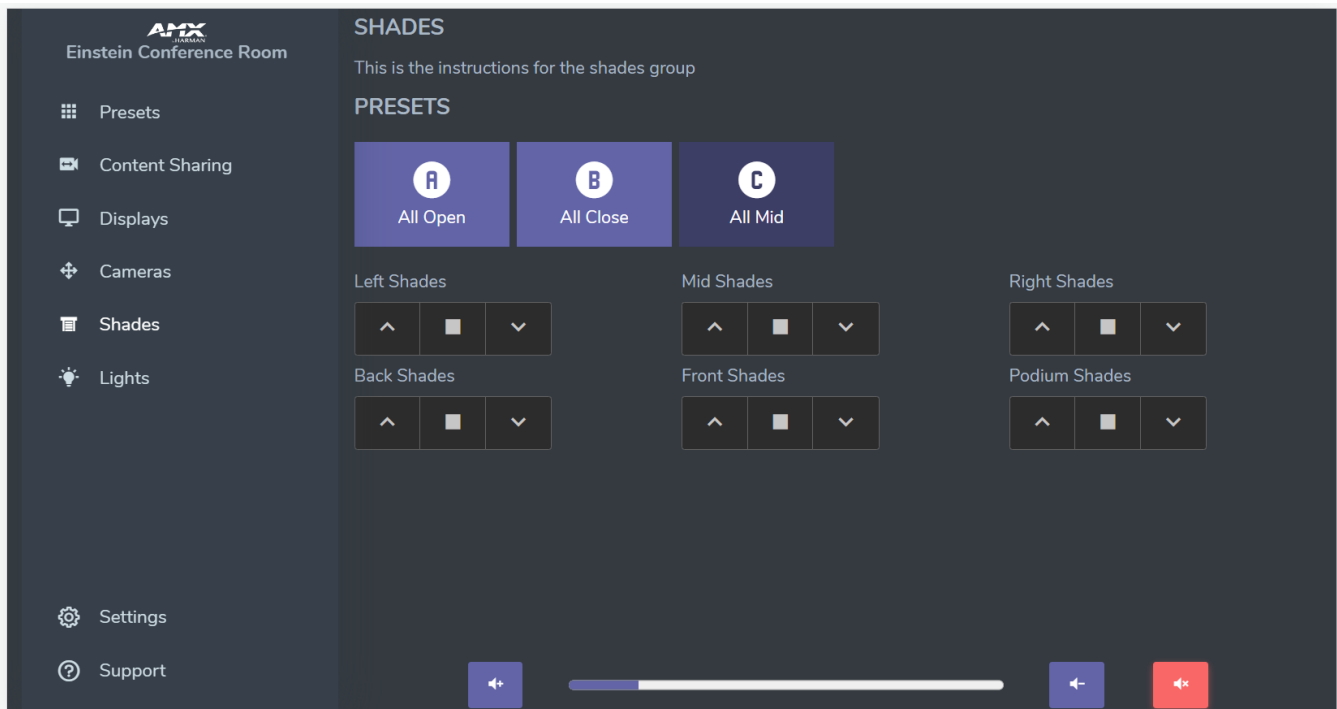

```
"categories": [
{
  "title": "Shades",
  "showTitle": true,
  "instruction": "This is the instructions for the shades group ",

]

```

CATEGORY - lights

Category uses default category object. with "shades" as the container for the configuration.

| Name | Default | Options | Description |
|-----------|---------|----------------------------|-----------------------------------|
| title | None | String | Display title |
| showTitle | false | true false | Shows title on sub-template |
| icon | None | valid MDI icon | Icon displayed in side navigation |
| type | | lights | Sets lights sub-template |
| presets | None | config:{} | Uses btn grid configuration |
| lights | array | Button Group Configuration | Defines displayed buttons |

LIGHTS CONFIGURATION

Configuration options vary between a dimmable light source and a toggle light source

SHARED OPTIONS

| Name | Default | Options | Description |
|-----------|---------|--------------|---|
| id | unique | String | |
| port | 1 | 1-20 | Netlinx port |
| title | None | String | Displays title near the device controls |
| showTitle | false | true false | |

DIMMABLE LIGHT

| Name | Default | Options | Description |
|-----------|---------|----------------------------|--|
| level | 1 | | Netlinx level |
| min | 0 | Integer | Minimum value allowed |
| max | 255 | Integer | Maximum value allowed |
| step | 1 | Integer | +/- amount for each slide movement |
| initValue | 127.5 | Integer | Sets the initial position prior to receiving update from code |
| showValue | true | true false | Shows the % value of the range |
| valuePOS | end | start center end | Positions text label |
| showThumb | true | true false | Show/hide the standard round thumbnail from the range track |
| changeOn | change | input,change, input change | Controls when to send outbound command to controller. <ul style="list-style-type: none">input = send as sliding.change = send after movement and slider is released.input change = both of these event |

TOGGLE LIGHT:

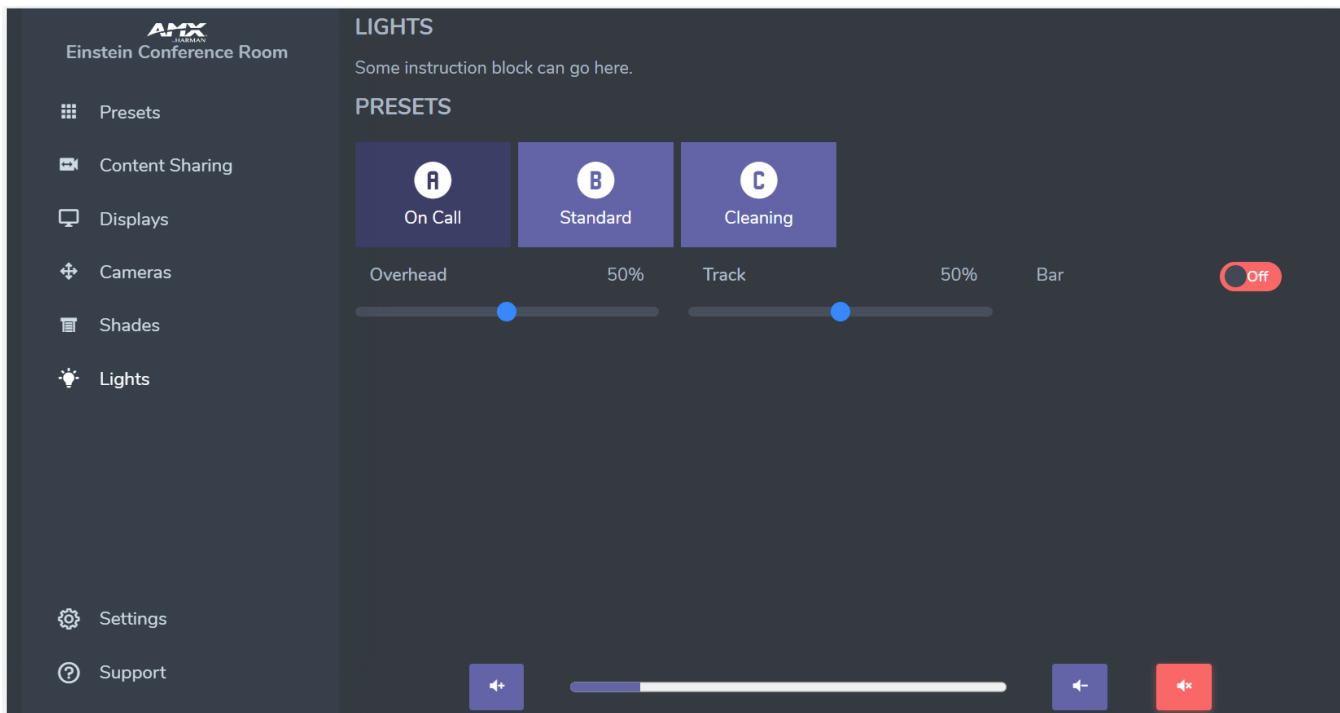

| Name | Default | Options | Description |
|----------|---------|---|---|
| channel | 1 | 1-1024 | Netlinx channel |
| color | none | none bool primary success info warning danger secondary | Bootstrap 5 switch colors |
| onLabel | No text | String | Sets text of switch when in the on state |
| offLabel | No Text | String | Sets text of switch when in the off state |

```
"categories":[
{
  "title": "Lights",
  "icon": "mdi-lightbulb-on",
  "showTitle": true,
  "instruction": "Some instruction block can go here.",
  "showInstruction": true,
  "type": "lights",
  "presets": {
    "config": {
```

VOLUME CONTROL

Volume control definition is not place specific and is not contained within the categories array.

| Name | Default | Options | Description |
|-----------|-----------------------|---|---|
| id | Auto-generated unique | string, no special characters | Generates html id for associated widget |
| title | | String | Label for volume control. Layouts vary and may not show label |
| showTitle | false | true false | Hide or show title label. If false label will not show on screen. Layout dependent, some may not show the label |
| port | 1 | Netlinx Limits | Netlinx Device Port |
| nxLevel | 1 | Netlinx Limits | Netlinx Device Level |
| nxMute | 199 | Netlinx Limits | Netlinx Channel for mute feedback |
| minLevel | 0 | integer | Minimum value for range |
| maxLevel | 255 | integer | Maximum value for range |
| stepLevel | 1 | integer | Step value for range |
| showThumb | false | true false | Hide or show the thumb for slider |
| color | primary | primary secondary success error warning info light dark | Sets color values for buttons |
| muteColor | danger | primary secondary success error warning info light dark | Sets color value for Mute |
| downIcon | mdi-volume-minus | Valid MDI icon | Use full icon class (IE: "mdi-this-icon") |
| upIcon | mdi-volume-plus | Valid MDI Icon | Use full icon class (IE: "mdi-this-icon") |

| | | | |
|-----------------|-----------------------|---|---|
| muteIcon | mdi-volume-mute | Valid MDI Icon | Use fill icon class (IE: "mdi-this-icon") |
| iconSize | 18 | 18,24,36,48 | Adjust size of icon in pixels. |
| setMuteStates | false | true false | Changes behavior of button to switch between the colors defined in customMuteColor for feedback. Standard behavior is inactive = muteColor; Active = muteColor + "active" with muteStates = true behaviour changes to inactive = customMuteColor[0] and active = customMuteColor[1] |
| customMuteColor | ["success", "danger"] | primary secondary success error warning info light dark | set as an array. First option is the inactive color, Second option is the active color. ["success", "danger"] |

MINIMUM CONFIGURATION OPTIONS

Volume Configuration

```
"volume": {
  "nxLevel": 1,
  "showThumb": false,
  "justify": "center"
},
"showVolume": true

```

Appendix: Side By Side Layout

This template supports the following options:

- Volume – Displayed in footer of the page. If Footer hidden, volume will also be hidden.
- Displays – Power Control of the displays in the room.
- Source - Allows source selection switching
- Devices – Supports devices with the following sub-pages
 1. Camera Control
 2. Wireless Presentation Block
 3. Hero instruction block

VOLUME:

CONFIGURATION OPTIONS:

| Name | Default | Options | Description |
|-----------|-----------------------|---|--|
| id | Auto-generated unique | string, no special characters | Generates html id for associated widget |
| title | | String | Label for volume control. optional but should be used |
| showTitle | false | true false | Hide or show title label. If false label will not show on screen |
| port | 1 | Netlinx Limits | Netlinx Device Port |
| nxLevel | 1 | Netlinx Limits | Netlinx Device Level |
| nxMute | 199 | Netlinx Limits | Netlinx Channel for mute feedback |
| minLevel | 0 | integer | Minimum value for range |
| maxLevel | 255 | integer | Maximum value for range |
| stepLevel | 1 | integer | Step Value for Range |
| showThumb | false | true false | Hide or show the thumb for slider |
| color | primary | primary secondary success error warning info light dark | Sets Color values for buttons |
| muteColor | danger | primary secondary success error warning info light dark | Sets color value for Mute |
| display | none | rounded, outline | Modifies buttons to use rounded or outline settings |

MINIMUM CONFIGURATION OPTIONS:

```
"volume": {
  "nxLevel": 1,
  "showThumb": false
}
```

DISPLAYS:

| Name | Default | Options | Description |
|--------|-----------------|--|---|
| title | "System Status" | String | Title to display for power block in template |
| config | none | Formatted as array. Configuration options below. | Configuration options for each display power block. |

CONFIGURATION OPTIONS:

| Name | Default | Options | Description |
|-------|------------|-----------------------|---|
| title | none | | Title displayed next to widget |
| mode | "discreet" | "discreet" "toggle" | Discreet renders individual buttons for both ON and OFF. Toggle will render a single button to toggle the power |

| | | | |
|-----------|--|-----------------------|---|
| display | square, standard button | rounded, outline | <p>Rounded = button with rounded corners.</p> <p>Outline = no fill in inactive state. Active states are filled.</p> <p>toggle buttons only use the text for Power ON, or label[0]</p> |
| label | "Power On", "Power Off", circle buttons display no text and show an icon | ["ON","OFF"] | Formatted as an array, any text value is accepted. |
| icon | mdi-power | Any valid mdi icon | Check supported list of icons to verify. string should be structured as "mdi-my-icon" |
| showIcon | false | true false | Show icon next to text in rounded or square buttons |
| port | 1 | Netlinx Device Port | Device Port declared in Netlinx Programming |
| fbChannel | 255 | Netlinx SNAPI channel | |

MINIMUM CONFIGURATION OPTIONS:

```

"displays": {
  "title": "Display Power",
  "config": [
    {
      "title": "Displays",
      "showTitle": true,
      "mode": "toggle",
      "margin": 0
    }
  ]
}

```

SOURCES:

| Name | Default | Options | Description |
|--------|------------------|---|---|
| title | "System Sources" | String | Title to display for source selection block in template |
| config | none | Required configuration for the button group. Uses settings below. | Configuration options for each is below |

| Name | Default | Options | Description |
|-------------------|--------------------------|---|---|
| id | Auto-Generated unique ID | | Provides HTML ID for associated buttons. |
| port | 1 | Integer from 1 - XXX | Netlinx Port |
| mutuallyExclusive | false | true false | Defines if multiple buttons in group are allowed to show active state at the same time. |
| color | primary | primary secondary success error warning info light dark | Sets color choices based on Bootstrap 5.0 color variants |
| display | none | rounded, outline | can be stacked "rounded outline", or individual "rounded" |
| spacing | 3 | 0 - 5 | Margin applied to the bottom of the button |
| showIcon | false | true false | Show icon defined for button on the button. |
| btns | none | See Below Table | Will generate error/alert if no btns defined. |

btns[{}]:

btns is an array, with object to determine the settings for the buttons

| Name | Default | Options | Description |
|---------|------------------------------|---|--|
| label | none | string | Text shown on button |
| icon | audio-video | any valid mdi icon | Icon list from theme pack. Name of icon without the preceeding mdi. IE - "mdi-audio-video", becomes "audio-video" |
| channel | none, but field is mandatory | integer | Netlinx Channel for output and feedback |
| margin | none | 0 - 5 | Replaces the spacing defined in the configuration options object with spacing to "this" button only. Only applies to margin bottom |
| color | none | primary secondary success error warning info light dark | Replaces the default color scheme with the color defined for "this" button. |

MINIMUM CONFIGURATION OPTIONS:

```

"sources": {
  "title": "Shared Content",
  "config": {
    "mutuallyExclusive": true,
    "showIcon": true,
    "spacing": 1,
    "btns": [
      { "label": "Room PC", "icon": "mdi-desktop-tower-monitor", "channel": 101 },

      { "label": "Stop Content", "icon": "mdi-television-stop", "channel": 105, "color": "danger" }
    ]
  }
}

```

DEVICES

| Name | Default | Options | Description |
|---------|---------|------------------------------|---|
| title | None | String | Title to show on device tab |
| icon | None | Valid mdi icons | Icon value should be in form of "mdi-my-icon" |
| content | None | camera wireless hero | Currently supported sub pages |
| config | None | Dependent on content options | See tables below |

CAMERA:

| Name | Default | Options | Description |
|--------------|---------|----------------------|--|
| id | None | String | Used for HTML purposes |
| port | 1 | 1 – 20 | NX Programming Port |
| Title | None | String | Title to show for project |
| showTitle | false | True false | Hide or show the title block |
| titlePOS | Start | Start end center | Position of title block |
| showZoomText | False | True false | Show/Hide a label between the Zoom buttons labelled "Zoom" |
| presets | None | [] SEE BELOW | Presets to use with camera controller. |
| presetPOS | Center | Start end center | Position of preset buttons |

CAMERA – PRESETS:

| Name | Default | Options | Description |
|---------|---------|----------|------------------------|
| Text | None | String | Button Label |
| Channel | None | 1 – 1024 | NX Programming Channel |

```

    ]
  }
}
```

WIRELESS:

| Name | Default | Options | Description |
|--------------|---------|---------|--|
| Instructions | None | String | Instruction block of text. Doesn't support inline HTML |
| url | None | String | URL provided by wireless presentation device |
| Code | None | String | Passcode provided by wireless presentation device |

```
{
  "title": "Wireless ",
  "icon" : "mdi-camera-wireless",
  "content" : "wireless",
  "config": {
    "instructions": "Connect your device via the USB button, and press the button to begin.      Connect smartphones, tablets or other wireless devices via mobile apps, the available link, or screen mirroring.",
    "url": "http://mywirelessdevice.com",
    "code": "1988"
  }
}
```

HERO:

| Name | Default | Options | Description |
|-------|---------|-----------------|--|
| Icon | None | Valid MDI icons | Icon to show at the top of the instruction block |
| Title | None | String | Title to show above the body text |
| Body | None | String | Body instructions/text |

```
{
  "title": "Table Input - Front",
  "icon" : "mdi-laptop",
  "content": "hero",
  "config": {
    "icon": "mdi-video-input-hdmi",
    "title": "Front HDMI ",
    "body": "Find the HDMI cable in the front of the table and connect to the laptops video output."
  }
}
```

Appendix: Custom Color Schemes

Custom colors and styles can easily be applied to all layouts with the use of the overlay listing. Every layout loads the overlay CSS sheet defined in the configuration file last, which allows for custom colors and even custom CSS styles to be applied. The CSS for Yealink, Teams, and Google Meet are predefined and useable without any color customization.

CONFIGURING THE CSS:

- Copy the following code into a new CSS file in your code editor.
- In your code editor of choice, modify either the color code (#474d56), the rgb values (135,144,247) or rgba values (135,144,247,0.5) as needed;
- These CSS classes represent the basic button colors, background colors, text colors, and card background colors used in all of the templates provided.
- Please note: The variables are represented twice - once in the section for light and once for dark. This provides flexibility if you'd like a completely different color scheme for each layout.
- Once complete, save the CSS File.

CUSTOM CLASS VALUES:

As this style sheet will load last during the site loading process, custom classes can be applied by adding the relevant class to the bottom of the style sheet and styling is as necessary. For examples on which class to modify, refer to the bootstrap 5 support website: <https://getbootstrap.com/>

Applying Changes:

- Once the style sheet is created, add the custom file to **assets/css/** folder found within the zip file.
- Modify the rooms configuration values. set the "overlay" value to match the name of the css file.
- Load both the configuration and updated zip to the processor and reload/refresh your web instance.

Custom Colors CSS

```
[data-layout-color="light"]{
  --amx-body-bg:#fafbfe;

//NOTE: These stay defined as --bs;
  --bs-body-color: #838c96;
